

FOR IMMEDIATE RELEASE

PDFTron Releases PDFNet SDK v.4, Adding Support for Java and Other Major Features

Vancouver, Canada, February 11, 2008 - PDFTron Systems Inc., a leading software developer specializing in PDF, SVG, and other graphics technologies, today announced the release of a new major version (v.4) of PDFNet SDK, an advanced and comprehensive PDF library for high-quality PDF creation, content extraction, editing, viewing and printing.

With version 4.0 of PDFNet SDK, PDFTron expands its development platform offering by adding full Java support to the PDF library. The new Java interface exposes the underlying API as a set of Java classes to enable developers to integrate PDFTron's powerful PDFNet API into their Java applications. PDFNet SDK for Java gives developers access to the same broad range of robust functionality already available for .NET, C and C++, while being able to take advantage of the many efficiencies and software development features available with the Java framework. Integration of the new Java version with other applications is a breeze and plenty of Java sample code is delivered as part of the standard distribution of PDFNet SDK.

"We've been urged by the developer community for a Java version of PDFNet SDK for a while," noted Catherine Andersz, Director of Marketing and Business Development. "Many users who preferred PDFNet SDK in terms of quality and functionality to other offerings were forced to spend time writing their own custom wrappers around our library or end up going with a less complete solution. Making the Java version of PDFNet SDK available allows software application developers to focus their time on building the core functionality of their applications while feeling assured to have their PDF needs covered now and into the future with the proven, reliable and continuously evolving PDFNet SDK."

Using the new version of PDFNet SDK, developers will also benefit from many new major features and functionality, including full support for transparency enabling developers to process complex documents created using high-end graphics applications such as Adobe® Illustrator® and InDesign®, for example. Other benefits also include fast and high-quality text extraction, text highlighting and search capabilities, as well as many API enhancements boosting the toolkit's already powerful performance and facilitating the delivery of further improvements in upcoming PDFNet v.4.x releases. A full list of the new features and functionality available in version 4.0 of PDFNet SDK can be found on PDFTron's website at: <http://www.pdftron.com/net/whatsnew.html>.

A comprehensive listing of functionality and features offered in PDFNet SDK can be viewed at: <http://www.pdftron.com/net/features.html>.

PDFNet SDK is available as a .NET component as well as a cross-platform Java and C/C++ library for Windows, Linux, Mac OSX and other platforms.

As always, PDFNet SDK supports all versions of the PDF Specification, including the latest PDF v1.7 (Adobe® Acrobat® 8.x) documents.

Availability of PDFNet SDK

Fully functional, 60-day evaluation versions of PDFNet SDK are available for download at: <http://www.pdftron.com/downloads.html>.

Pricing for PDFNet SDK is based on functionality and deployment requirements. CPU Licenses of PDFNet SDK can be purchased directly online at: <http://www.pdftron.com/store.html>. PDFTron also offers pricing models for software developers who will be distributing PDFNet SDK as part of their application (OEM/Redistribution), as well as for corporate customers who wish to integrate the PDFNet library as part of their internal application (Enterprise/Internal Use). Please visit: <http://www.pdftron.com/net/licensing.html> for more information on licensing PDFNet SDK or contact a PDFTron representative at: info@pdftron.com.

About PDFTron Systems Inc.

Specializing in PDF (Portable Document Format), SVG (Scalable Vector Graphics) and other graphics technologies, PDFTron is a leading, provider of cross-platform, high-performance and high-quality developer tools and libraries. PDFTron's commitment to provide excellent products and service at

reasonable prices has turned PDFTron into virtually the best resource for software developers, systems integrators, OEMs, and IT-specialists in all market segments. PDFTron has built a substantial market presence with thousands of companies using the products directly and hundreds of thousands of users benefiting from the technology indirectly via an international network of OEM partners.
